PROFILE

Software Development Engineer (SDE) aspirant with hands-on experience in designing and developing full-stack web applications using React.js, Node.js, Express.js, Flask, and MongoDB. Proficient in Python, JavaScript, SQL, RESTful API development, JWT authentication, and database design. Passionate about backend development, scalable distributed systems, and building secure, reliable, and maintainable software. Strong problem-solving skills with a continuous learning mindset and a keen interest in applying modern software engineering best practices to deliver high-quality products.

EDUCATION

B.Tech Artificial Intelligence and Machine Learning SRI SHAKTHI INSTITUTE OF ENGINEERING AND TECHNOLOGY, COIMBATORE 77 %	2023 – 2027 Coimbatore
HSC TRINITY MATRICULATION HIGHER SECONDARY SCHOOL 86.33%	2023 Coimbatore

SKILLS

Programming Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, Tailwind CSS
Frameworks: React.js, Node.js, Express.js, Flask
Database: MongoDB, MySQL
Core CS: OOP, DBMS
Tools: Git, GitHub, VS Code, Postman, MongoDB Atlas
Soft Skills: Problem Solving, Communication, Teamwork

PROFESSIONAL EXPERIENCE

Software Development Intern Cocoveera 	05/2026 – 07/2026 Coimbatore
- Developed and maintained a production-ready MERN stack B2B e-commerce platform for managing products, customers, RFQs, quotations, and export orders. - Designed and implemented RESTful APIs, integrated MongoDB, and developed secure business workflows for international wire transfer based purchasing. - Built responsive customer and admin dashboards, resolved bugs, tested new features, and contributed to the successful production launch on August 1, 2026.	

PROJECTS

Smart Farming Assistant  Python, Flask, MongoDB, Gemini API - Developed an AI-powered web application that provides crop recommendations, disease identification, fertilizer suggestions, weather insights, and AI-powered daily market price analysis for farmers. - Integrated Gemini API, weather services, and MongoDB to provide personalized farming insights and manage user data efficiently. - Built a Flask-based backend with responsive web interfaces, delivering an end-to-end solution for smart agricultural decision-making.
AgriStore – Agricultural Marketplace  React.js, Node.js, Express.js, MongoDB - Developed a full-stack agricultural marketplace enabling users to browse, purchase, and manage agricultural products through a responsive web application. - Implemented secure JWT-based authentication, RESTful APIs, product and inventory management, and integrated Razorpay for secure online payments. - Built a responsive admin dashboard for managing users, products, categories, orders, and transactions, ensuring efficient business operations.

ACHIEVEMENTS

Finalist – Flinders University AI Competition Contributed as a Frontend Developer by designing and developing the team's web application, helping the team reach the finalist stage.	2026 Coimbatore
